ANSWER TO ARGUMENTS

In analyzing the applied prior art to Preller it appears that applicant has taken a narrow interpretation of the term component. Applicant argues that the first and second components are separate and distinct from each other and further that these components are applied separately. In a close reading of the claims it should be noted that the language of "...separate and distinct.. " was not use to claim the component elements. In fact the term component in a reasonably broad interpretation would encompass any part of a unitary structure. It should be noted that in Prellér the device has first and second parts/components applied to the left and right side of the wound.

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

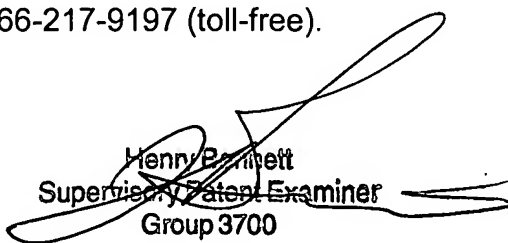

Art Unit: 3743

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
